

THE FUTURE OF K-12 IS SOCIAL

The Edsby learning environment empowers your educators and families to support K-12 student learning in ways you didn't know were possible.

The full-featured Edsby platform puts the connections between people, not just documents, at the center of student learning.

_____ In-class, hybrid & online _____

_____ Communication _____

_____ Student success _____

"I use Edsby every day and find it suits my needs as teacher. It has everything in one: class lists, grades, parent communication, groups for student communication and more."

— Claudia Davidson, Teacher / Kawartha Pine Ridge District School Board, 34,000 students and 3,450 staff on Edsby

Use Edsby for

Community Engagement	Learning Management	Assessment & Reporting	Analytics	Student Well-Being

What sets Edsby apart

Designed specifically for K-12

Edsby was made for the assessment, workflows and other unique aspects of K-12. Other learning systems try to serve higher education and business as well. Edsby's K-12 focus shows.

Full featured

No other learning platform in K-12 has the breadth of community, classroom management & reporting, intervention, parent engagement and other features of Edsby.

One integrated application

Edsby was built from day one as a single, well-designed system by a single engineering team. It wasn't pieced together from acquisitions like every other platform in K-12.

The Edsby platform's secret

It's constantly changing. And it's at the core of everything in K-12: a complex social graph of students, parents, teachers, and courses that's unique to K-12. Only Edsby builds this database from a district or region's existing data and puts it at the heart of everything it does, making it actionable for educators and policymakers.
